

General Information

Chemical Formula	C ₄ H ₄ O ₄	
Synonym	2-Butenedioic acid, Trans-butenedioic Acid,	
Origin	China	
H.S. Code	29171950	
CAS No.	110-17-8	
Molecular Weight	116.072 g mol ⁻¹	

Application

Food Industry	It is used as an acidity regulator, as a substitute for tartaric acid and citric acid and as a coagulant..
Pharmaceutical Industry	It reduce relapse in patients with multiple sclerosis.
Other applications	It is used in the manufacture of polyester resins, livestock feed, cosmetics, mordant for dyes.

Specification

Property	Units	Value
Appearance		White, odorless granules or crystalline powder
Assay	%	≥99.5
Moisture	%	≤0.5
Heavy metals (Pb)	ppm	≤10
Arsenic (As)	ppm	≤3
Ash	%	≤0.5
Chroma	Pt-Co	≤15
Sulfate	%	≤0.01

Packaging

- 720 @ 25 kg Plastic woven lined with PE bags; 18 MT / 20'FCL (with pallet)
- 800 @ 25 kg Plastic woven lined with PE bags; 20 MT / 20'FCL (without pallet)
